

for both static  
and moving  
recording  
systems

## NUMBER PLATE READING

Eyedeia Recognition develops and delivers own Automatic Number Plate Reading software (ANPR). We specialize mainly in high-end ANPR solutions optimized according to customer specifications.

Eyedeia Recognition produces a license plate reading software both for static and moving (hand-held) systems.

## HIGHLIGHTS

- Extremely effective and fast number plate detector
- OCR engine designed especially for number plate reading
- SDK enabling a simple integration into a customer's solution
- All the engines are optimized for customer's specific conditions (i.e. for specific cameras, CPU, lighting conditions, localization etc.)
- For arbitrary number plate format and color
- For different fonts including both Latin and non-Latin characters

## APPLICATIONS

- Toll-systems
- Average speed limit monitoring
- Traffic monitoring
- Traffic data collection
- Travel time measurement
- Traffic law enforcement

The Eyedeia ANPR engines power the CAMEA UNICAM ANPR system installed in many parts around the world.
